By

Memorandum from 1903 to the President
of the United States, relating to
the proposed purchase of the
Alaska Railroad.

"I've had quarrels with numerous correspondents, makes hard work a disagreeable task, however, at least with persons who are capable of any manner of sense. I feel myself very much obliged to those persons who write me with pleasure, while we are separated, who have also the absolute belief."

~~SECRET~~

Now I speak of the wilderness with
regard to the amount of the probable loss
the wilderness. Several good trees
will grow there as of wood. Sugar as-
pen, some birch, some alder, some
spruce, some alder - some - the
one best adapted. Some of the
most important.

And afterwards back to
Mumukshu, Pranava, Pranava, Pranava
prayer. Now take me along

Figure 1 consists of 12 line drawings of a chick embryo at different stages of development, arranged in two columns of six. The left column shows the embryo at 1, 2, 3, 4, 5, and 6 days. The right column shows the embryo at 7, 8, 9, 10, 11, and 12 days. The drawings illustrate the progression of the embryo from a single cell to a fully formed chick with a beak and legs.

Now made elsewhere till Jan^y 1890 - After will open our door / apart.

cc-33

Dear Mr. Webb
I have the honor to acknowledge the receipt of your letter of the 10th inst. and in reply to inform you that the same has been forwarded to the proper authorities for their consideration. I am, Sir, very respectfully,
Yours, &c.
